DYNASTY® FORAGE

PRODUCT DESCRIPTION

A chopped timothy/alfalfa hay blend. It may be used as a complete pasture, hay replacement or used to supplement existing forage. It is suitable for horses, cattle, sheep, and goats. This product is not fortified with vitamins or trace minerals and should not be used to replace grain.

FEATURES AND BENEFITS

Chopped form allows for slow consumption and promotes chewing and saliva production, thus reducing the potential for digestive upset.

Compressed 50-lb plastic bag makes it convenient and easy to handle.

Sun-cured blend provides animals' premium forage. Can be fed when hay quality is poor or when supplies are limited. Use with a grain ration when additional fiber and lower starch content is desirable to help promote good digestive flow and function.

High palatability so animals eat it readily.

Less dust than hay which reduces dust and mold exposure to horses, especially beneficial for horses with allergies to hay.

Blister beetle free so provides a good alternative to traditional hays which may be contaminated.

FEEDING DIRECTIONS

To supplement existing forage, feed at a rate of 4-6 lb/head/day. As the sole source of forage, feed at a rate of 1-1.5% of body weight.

CAUTION: Do not use solely as a complete feed.

DYNASTY® FORAGE

For all classes of beef cattle and horses.

DYNASTY® PRIDE

PRODUCT DESCRIPTION

A cubed, complete horse feed containing high-fiber ingredients designed for situations when roughage is in limited supply. It is easily transported - perfect for trail rides.

Recommended for horses with respiratory problems such as heaves. The cube form slows consumption, thereby minimizing the risk of digestive disturbances. The product can also be soaked for horses with poor dental health. Fixed component formula provides your horse high quality nutrition in every bag.

FEATURES AND BENEFITS

Guaranteed amino acid levels are important for growth, reproduction and healthy hooves, hair and skin.

Added vegetable oil for a high digestible source of calories to help support performance and endurance.

Premium ingredients like beet pulp supply a healthy digestible fiber source.

Added complexed trace minerals which are more readily available compared to inorganic mineral sources.

Low level of dietary starch and sugars for maintaining weight of horses with metabolic issues and calmer dispositions.

High level of vitamin E, an antioxidant, which is important for a healthy immune system.

Added biotin for hoof health.

Selenium yeast is an organic source of selenium.

Cubed as a large pellet generally consumed individually thus slowing consumption and approximates the horse's more natural style of eating.

FEEDING DIRECTIONS

Feed a rate of 0.25 - 2.0 lb/100 lb body weight daily. A small quantity of good quality hay should be fed to maintain good digestion and prevent boredom. If no hay is fed, gradually adjust feeding rate based on body condition and feed at least 3 times/day.

Provide fresh, clean water and salt free-choice. Provide Equestrian's Choice® Mineral free-choice if horses are fed less than 6 lb/day.

DYNASTY® PRIDE

For maintenance and performance of mature horses, horses with allergies or heaves, and stabled horses

DYNASTY® SECURE

PRODUCT DESCRIPTION

Specially formulated to provide a balanced diet for easy keepers and pleasure horses with built-in safety for group feeding applications. Elevated fiber and low levels of dietary starch and sugar allow for easy digestion plus the convenience of one feed for the entire stable. Fixed component formula provides your horse high quality nutrition in every bag.

FEATURES AND BENEFITS

Guaranteed amino acid levels are important for growth, reproduction and healthy hooves, hair and skin.

Added vegetable oil for a high digestible source of calories to help support performance and endurance.

Premium ingredients supply healthy digestible fiber.

Added complexed trace minerals are more readily available compared to inorganic mineral sources which is crucial for young horses & brood mares.

Omega-6/Omega-3 fatty acids for healthy immune system plus glossy skin and coat.

High level of vitamin E, an antioxidant, which is important for a healthy immune system.

Added biotin for hoof health.

Selenium yeast is an organic source of selenium.

Yeast culture aids in fiber digestion.

Pelleted for feeding convenience with less waste and better digestibility.

FEEDING DIRECTIONS

Feed, with roughage, to horses of all ages at the rate of 0.25 - 2 lb per 100 lb body weight depending on age, condition, performance level, and reproductive status. Provide good quality hay or pasture, fresh clean water, and salt free-choice. Provide Equestrian's Choice® Mineral free-choice if fed less than 6 lb/day. It is recommended feed changes be made gradually.

DYNASTY® SECURE

For easy-keepers and pleasure horses.

DYNASTY® GROW 16/6

PELLET

Pelleted Horse Feed

PRODUCT DESCRIPTION

Dynasty Grow 16/6 Pellet is formulated to meet the demanding nutritional needs of lactating mares and young growing foals. Contains a high nutritional profile with an optimum balance of energy and fiber for safe grain feeding. It can also be fed to show horses on low-protein hay or when extra shine and condition is desired.

Available in a 50-lb bag.

FEATURES AND BENEFITS

Essential amino acids like lysine, methionine and threonine ensure that quality protein is available for continuous growth and rebuilding of muscle tissue.

High fat from vegetable oil increases energy density and efficiency for sustained performance and endurance. Incorporating oil helps reduce the risk of starch overload while maintaining desired calorie level for optimum weight and body condition of horses in various life stages.

An Advanced Antioxidant Package consisting of stable vitamins and biologically available trace minerals may help maximize the immune system response, maintaining optimal health and metabolism.

Yeast culture along with a consistent fixed component formula aids in maintaining a healthy and stable digestive tract environment.

Stable vitamins and a precisely balanced mineral package incorporating organically bound trace mineral complexes may help promote joint and bone health and strength.

Quality protein, B-vitamins and organically bound trace mineral complexes may help promote healthy skin, hair coat and hoof condition, enhancing overall appearance.

FEEDING DIRECTIONS

Dynasty® Grow Pellet is a high-quality feed for young growing foals and lactating mares.

DAILY GUIDE: It is necessary to adjust the feeding of Dynasty Grow Pellet to the condition of the horse. Provide horses with good-quality hay or pasture, free-choice salt and plenty of fresh water.

BREEDING		
Lactating, first 3 mos.	Mature	0.75 - 1.15

**Suggested program is based on offering grass or mixed grass hays.*

NOTE: If feeding legume hays, rich pasture, or if Dynasty Grow Pellet is fed below the recommended feeding range, consult your Kent Nutrition Group Feed Representative for a ration recommendation.

The suggested feeding program above is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animal's dietary requirements.

CAUTION: This feed contains supplemental copper. Do not feed to sheep.

Store in a cool, dry place. This product may spoil if stored under adverse conditions. Do not feed this product if believed to be unfit for animal consumption.

DYNASTY® PRO

14/6 PELLET

Pelleted Horse Feed

PRODUCT DESCRIPTION

Dynasty Pro 14/6 Pellet is formulated to meet the nutritional requirements for all life stages including growing horses, active performance horses, breeding stallions and pregnant/lactating mares. Dynasty Pro incorporates a blend of fat and fermentable fiber; providing safe calories in a balanced diet for the professional equine operation.

Available in a 50-lb bag.

FEATURES AND BENEFITS

Essential amino acids like lysine, methionine and threonine ensure that quality protein is available for continuous growth and rebuilding of muscle tissue.

High fat from vegetable oil increases energy density and efficiency for sustained performance and endurance. Incorporating oil helps reduce the risk of starch overload while maintaining desired calorie level for optimum weight and body condition of horses in various life stages.

DYNASTY® SENIOR

14/6 PELLET

Pelleted Horse Feed

PRODUCT DESCRIPTION

Dynasty Senior 14/6 Pellet is formulated with high fiber and added fat to meet the increased nutritional demands of mature and active senior horses. The high fiber diet supports healthy digestive activity while the added fat provides the extra calories needed to maintain desired body condition in aging horses.

Available in a 50-lb bag.

FEATURES AND BENEFITS

Essential amino acids like lysine, methionine and threonine ensure that quality protein is available for continuous growth and rebuilding of muscle tissue.

High fat from vegetable oil increases energy density and efficiency for sustained performance and endurance. Incorporating oil helps reduce the risk of starch overload while maintaining desired calorie level for optimum weight and body condition of horses in various life stages.

High fiber maintains healthy hind-gut fermentation while providing extra calories in a safe and natural form.

An Advanced Antioxidant Package consisting of stable vitamins and biologically available trace minerals may help maximize the immune system response, maintaining optimal health and metabolism.

Yeast culture along with a consistent fixed component formula aids in maintaining a healthy and stable digestive tract environment.

Stable vitamins and a precisely balanced mineral package incorporating organically bound trace mineral complexes may help promote joint and bone health and strength.

Quality protein, B-vitamins and organically bound trace mineral complexes may help promote healthy skin, hair coat and hoof condition, enhancing overall appearance.

FEEDING DIRECTIONS

Dynasty® Senior Pellet is a high-quality, high-fat horse feed for maintenance and performance of senior horses.

DAILY GUIDE: It is necessary to adjust the feeding of Dynasty Senior Pellet to the condition of the horse. Provide horses with good-quality hay or pasture, free-choice salt and plenty of fresh water.

Horse Class	SUGGESTED FEEDING RANGE*	
	Age	lb/100-lb body weight/day
GROWTH		
2-Year Old	24 to 36 mos.	0.60 - 0.85
ADULT		
Light Exercise	Mature	0.45 - 0.70
Moderate Exercise	Mature	0.50 - 0.80
Heavy Exercise	Mature	0.70 - 0.95
Very Heavy Exercise	Mature	0.80 - 1.45
BREEDING		
Pregnant Mare, last 3 mos.	Mature	0.45 - 0.70
Breeding Stallion	Mature	0.50 - 0.80

**Suggested program is based on offering grass or mixed grass hays.*

NOTE: If feeding legume hays, rich pasture, or if Dynasty Show Textured is fed below the recommended feeding range, consult your Kent Nutrition Group Feed Representative for a ration recommendation.

The suggested feeding program above is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animal's dietary requirements.

CAUTION: This feed contains supplemental copper. Do not feed to sheep.

Store in a cool, dry place. This product may spoil if stored under adverse conditions. Do not feed this product if believed to be unfit for animal consumption.

DYNASTY® XT GROW

16/10

Textured Horse Feed

PRODUCT DESCRIPTION

Dynasty XT Pro 16/10 is a high-protein, high-fat, textured feed containing shredded beet pulp that offers a safe and natural way to provide essential nutrition to lactating mares and young growing foals. Dynasty XT Pro 16/10 can also be fed to show horses on low-protein hay or when extra shine and condition is desired.

Available in a 50-lb bag.

FEATURES AND BENEFITS

Essential amino acids like lysine, methionine and threonine ensure that quality protein is available for continuous growth and rebuilding of muscle tissue.

A sequential release of “cool” energy resulting from high fat and fermentable fiber provides safe, low-starch calories to meet the complex demands of horses in various life stages.

An Advanced Antioxidant Package consisting of stable vitamins and biologically available trace minerals may help maximize the immune system response, maintaining optimal health and metabolism.

Highly fermentable fiber from shredded beet pulp and extruded super-fiber nuggets maintains healthy hind-gut fermentation while providing extra calories in a safe and natural form.

Probiotics and prebiotics including direct-fed microorganisms, yeast culture and fermentable fiber plus a low starch and sugar diet aid in maintaining a healthy and stable digestive tract environment.

Omega-3 fatty acids, stable vitamins and a precisely balanced mineral package incorporating organically bound trace mineral complexes may help promote joint and bone health and strength.

Multiple sources of Omega-3 and Omega-6 fatty acids plus quality protein, B-vitamins and organically bound trace mineral complexes may help promote healthy skin, hair coat and hoof condition, enhancing overall appearance.

Shredded Beet Pulp - A highly fermentable, low starch and sugar fiber source provides a safe and natural form of energy to the equine athlete. Shredded beet pulp delivers a slow, continual release of fuel for extended activity and performance without the risks associated with high-starch feeding.

DYNASTY® XT GROW 16/10

A textured horse feed for suckling foals, growing horses, and lactating mares.

FEATURES AND BENEFITS *(continued)*

Pressure Cooked Super-Fiber Nuggets - The pressure cooking process has been shown to improve feed digestibility and nutrient utilization. The unique combination of Beet pulp, Soy Hulls and Rice Bran provides extra calories in a highly fermentable form while promoting healthy digestive activity.

High Fat - Vegetable Oil increases energy density, improving stamina and delaying the onset of fatigue in competition horses. The addition of fat helps reduce the risk of starch overload while maintaining desired energy level for optimum weight and body condition of active horses.

Omega 3 and Omega 6 Fatty Acids - Essential fatty acids from Soybean oil, Flaxseed and Marine Algae (direct source of DHA) help promote a healthy skin and hair coat. DHA plays a role in the anti-inflammatory process, is a structural component of nerve cells and a key component of heart tissue.

Quality Protein with Guaranteed Lysine, Methionine and Threonine - Guaranteed lysine, methionine and threonine levels help ensure quality protein is available for the continuous growth and rebuilding of muscle tissue in active horses. Methionine is essential for good health and condition of hooves and hair coat.

Chelated Zinc, Copper and Manganese, Plus Bio-Available Selenium - The greater mineral absorption and utilization helps meet the increased needs for bone, muscle and tissue strength in performance horses. The more biologically available forms promote the immune system sustaining overall health, especially in horses under stress.

Advanced Antioxidant Package: Natural Tocopherols, Vitamin E, Selenium and Stable Vitamin C - As potent antioxidants, these nutrients support tissue integrity and function, reducing muscle damage. Antioxidants maximize immune response and help maintain optimal health and metabolism.

B-Complex Vitamins (including Biotin) - Actively involved in the metabolism of carbohydrates, fats and protein into usable energy for performance. Added B vitamins support healthy growth of skin, hair and hooves.

Probiotics and Prebiotics - Direct-Fed microorganisms, Yeast Culture, Fermentation Products and Manan-Oligosaccharides (MOS) aid in maintaining healthy digestion and active microbial fermentation for sustained nutrient digestibility, absorption and assimilation. These additives, including guaranteed levels of *Bacillus* species, may support the presence of beneficial bacteria in the gut, resulting in a more stable digestive tract environment and ultimately sustained horse health.

FEEDING DIRECTIONS

Dynasty XT Grow 16/10 is a high-protein, high-fat, textured feed containing shredded beet pulp that offers a safe and natural way to provide essential nutrition to lactating mares and young growing foals. Dynasty XT Grow 16/10 can also be fed to show horses on low-protein hay or when extra shine and condition is desired.

DAILY GUIDE: It is necessary to adjust the feeding rate of Dynasty XT Grow 16/10 to the condition of the horse. Provide good-quality hay or pasture, free-choice salt, and plenty of fresh water.

Horse Class	Age	SUGGESTED FEEDING RANGE* lb/100-lb body weight/day
GROWTH		
Suckling	0 - 4-6 mos.	0.70 - 1.10
Weanling	4-6 - 12 mos.	0.90 - 1.40
Yearling	12 - 18 mos.	0.60 - 0.95
Long Yearling	18 - 24 mos.	0.55 - 0.75
2-Year-Old	24 - 36 mos.	0.45 - 0.70
ADULT		
Moderate Exercise	Mature	0.45 - 0.65
Heavy Exercise	Mature	0.55 - 0.70
BREEDING		
Pregnant Mare, last 3 mos.	Mature	0.40 - 0.65
Lactating Mare, 4 - 6 mos.	Mature	0.65 - 1.10

**Suggested program is based on offering grass or mixed grass hays. If feeding legume hays or rich pasture, consult your Kent Nutrition Group Representative. For additional mineral-vitamin fortification, or if Dynasty XT Grow 16/10 is fed below the recommended feeding range, feed the appropriate Kent Nutrition Group Equine Supplement. The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the dietary requirements.*

CAUTION: This feed contains supplemental copper. Do not feed to sheep.

DYNASTY® XT PRO

14/10

Textured Horse Feed

PRODUCT DESCRIPTION

Dynasty XT Pro 14/10 is a highly versatile textured feed containing shredded beet pulp. It provides an ideal balance of protein, fat and fiber from low starch and sugar ingredients to meet the intense demands of horses at various life stages. Dynasty XT Pro 14/10 offers a safe and natural way to provide essential nutrition to growing horses, performance horses, gestating mares, breeding horses and senior horses.

Available in a 50-lb bag.

DYNASTY® XT SHOW

12/10

Textured Horse Feed

PRODUCT DESCRIPTION

Dynasty XT Show 12/10 is a high-fat, high-fiber, textured feed containing shredded beet pulp designed for active horses involved in a variety of competitive disciplines. Dynasty XT Show 12/10 offers a safe and natural way to provide essential nutrition and calories to performance horses. It is also an ideal choice for horses with elevated caloric requirements such as hard-keepers, rescue horses and metabolically challenged senior horses.

Available in a 50-lb bag.

SENTINEL® GROW AND EXCEL GX

PRODUCT DESCRIPTION

Sentinel® Grow & Excel, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically to meet the intense demands of young growing horses and active performance horses. A precise balance of protein, high fat and fiber from low starch/sugar ingredients provides healthful nutrition throughout growth and into performance.

This versatile formulation of Sentinel Grow & Excel is also an ideal choice for breeding stallions and pregnant mares in late gestation. A pressure cooked feed offers a safe and natural way to provide essential nutrition and calories to growing and performing horses and is more easily digested for optimal nutrient utilization.

FEATURES AND BENEFITS

Immune System Support – Sentinel® incorporates an Advanced Antioxidant Package containing Vitamin E, Vitamin C, Vitamin A, Bio-available Selenium, Chelated Zinc, Copper and Manganese plus Methionine. These nutrients aid in the development of a healthy immune system in young growing foals. These nutrients also sustain tissue integrity and strength helping to support mammary health in lactating mares.

Growth and Development – Sentinel® contains guaranteed levels of the Amino Acids Lysine, Methionine and Threonine. Amino Acids are the building blocks of quality protein necessary for growth and maintenance of all tissues including bone, muscle, hoof and hair. Protein is also important for milk production in lactating mares.

Body Structure and Function – Complete balanced package of macro minerals, trace minerals and vitamins help build, strengthen and maintain all body tissues including bone and muscle. These nutrients also help regulate metabolic activities and help support the immune system to sustain overall health. The more biologically available chelated forms of zinc, copper and manganese plus selenium yeast ensure these nutrients reach their target tissues for enhanced function and health. Precise mineral nutrition and balance is important for mare milk composition and proper bone development in growing foals.

Low Starch and Sugar Ingredients – A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying-up, DOD, EPSM, colic and laminitis.

FEATURES AND BENEFITS (continued)

Healthy Rate of Intake – The light and airy nature of pressure cooked feeds may facilitate the breakdown of feed for horses while encouraging slower consumption and more thorough chewing. A slower rate of intake with more complete chewing may help minimize the risk of digestive upsets, such as colic and choke.

High Nutrient Density – Provides more actual nutrition by weight; you may feed less while delivering more of what your horse needs for optimum health and ideal body condition.

Stable Digestive Environment – Direct-fed microorganisms, yeast culture, fermentation products and mannanoligosaccharides (MOS) aid in maintaining healthy digestion and active microbial fermentation for sustained nutrient digestibility, absorption and assimilation. These additives, including guaranteed levels of *Bacillus* species, may support the presence of beneficial bacteria in the gut, resulting in sustained horse health and a more stable digestive tract environment.

Built-In Fiber – Highly fermentable fiber sources such as soybean hulls, rice bran and beet pulp support healthy digestive activity while providing extra calories in a safe and natural form.

Healthy Skin and Hair Coat – Highly digestible fat from Soybean Oil and Flaxseed (sources of Omega-3 and Omega-6 fatty acids) helps provide extra calories for maintaining ideal body condition and helps promote a healthy skin and hair coat.

Brain and Visual Support – Docosahexaenoic Acid (DHA), an Omega-3 fatty acid, is a structural component of nerve cells in the brain and eyes and a key component of heart tissue. Studies have shown that DHA is important for mental and visual development and plays a key role in the anti-inflammatory process.

SUGGESTED FEEDING RECOMMENDATIONS*:

Horse Class	Age	lb/100 lb body wt./day
GROWTH		
Yearling	12 to 18 mos.	0.60 - 0.95
Long Yearling	18 to 24 mos.	0.60 - 0.85
2-Year Old	24 to 36 mos.	0.55 - 0.70
ADULT		
Moderate Exercise	Mature	0.45 - 0.65
Heavy Exercise	Mature	0.55 - 0.75
Very Heavy Exercise	Mature	0.65 - 1.20
BREEDING		
Pregnant Mare, last 3 months	Mature	0.40 – 0.70
Lactating Mare, 4 - 6 months	Mature	0.75 – 1.10
Breeding Stallion	Mature	0.40 - 0.60

**Suggested program is based on offering grass or mixed grass hays. If feeding legume hays or rich pasture, consult your Kent Nutrition Group Feed Representative or Customer Service.*

Sentinel® Grow and Excel is also recommended for horses with challenged digestive and/or metabolic systems - contact your Kent Nutrition Group Feed Representative for specific recommendations. Some good quality hay should be offered to help maintain good digestive function and prevent boredom.

DAILY GUIDE: Approximate feed weight to volume: 0.85 lb = 1 quart. It is necessary to adjust the feeding of Sentinel® Grow and Excel to the condition of the horse. Provide salt and plenty of fresh water free choice.

COMMENTS: For additional mineral-vitamin fortification, or if Sentinel® Grow and Excel is fed below the recommended feeding range, feed the appropriate Kent Nutrition Group Equine Supplement, depending on type of hay being fed.

The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animal's requirements.

SENTINEL® LIFETIME LT

PRODUCT DESCRIPTION

Sentinel® LifeTime is a nutrient-release formula feed formulated for active junior, adult and senior horses specifically where joint health is a potential concern. A high-fat, high-fiber complete feed fortified with essential nutrients plus glucosamine HCl and chondroitin sulfate provides superior nutrition to meet the physiological and metabolic needs of active horses for a lifetime of health and performance.

This unique formulation is also recommended for certain horses with challenged digestive and/or metabolic systems. A pressure-cooked feed offering a safe and natural way to provide essential nutrition and calories to active junior, adult and senior horses and is easily digested for optimal nutrient utilization.

FEATURES AND BENEFITS

Immune System Support – Sentinel® incorporates an Advanced Antioxidant Package containing Vitamin E, Vitamin C, Vitamin A, bio-available Selenium, Chelated Zinc, Copper and Manganese plus Methionine. These antioxidant nutrients aid in maintaining the integrity and strength of cells and tissues in active horses. A healthy immune system aids in disease resistance, helping to sustain a lifetime of health and wellness.

Strong and Healthy Tissues and Joints – Sentinel® contains guaranteed levels of the Amino Acids Lysine, Methionine and Threonine. Amino Acids are the building blocks of quality protein necessary for growth and maintenance of all tissues including bone, muscle, hoof and hair. Glucosamine HCl and Chondroitin Sulfate are ingredients to help support joint and connective tissue health.

Body Structure and Function – Complete balanced package of macro minerals, trace minerals and vitamins help build, strengthen and maintain all body tissues including bone and muscle. These nutrients also help regulate metabolic activities and help support the immune system to sustain overall health. The more biologically available chelated forms of zinc, copper and manganese plus selenium yeast ensure these nutrients reach their target tissues for enhanced function and health.

Sequential Release of 'Cool' Energy – A specific balance of fat and fermentable fiber provides safe calories at different rates in the body to meet the complex demands for growth and performance.

continued

FEATURES AND BENEFITS *(continued)*

Low Starch and Sugar Ingredients - A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying-up, DOD, EPSM, colic and laminitis.

Healthy Rate of Intake – The light and airy nature of pressure cooked feeds may facilitate the breakdown of feed for horses while encouraging slower consumption and more thorough chewing. A slower rate of intake with more complete chewing may help minimize the risk of digestive upsets, such as colic and choke.

High Nutrient Density – Provides more actual nutrition by weight; you may feed less while delivering more of what your horse needs for optimum health and ideal body condition.

Stable Digestive Environment – Direct-fed microorganisms, yeast culture, fermentation products and mannan-oligosaccharides (MOS) aid in maintaining healthy digestion and active microbial fermentation for sustained nutrient digestibility, absorption and assimilation. These additives, including guaranteed levels of *Bacillus* species, may support the presence of beneficial bacteria in the gut, resulting in sustained horse health and a more stable digestive tract environment.

Built-In Fiber – Highly fermentable fiber sources such as soybean hulls, alfalfa meal, beet pulp and rice bran support healthy digestive activity while providing extra calories in a safe and natural form. Sentinel Life Time can also be fed as a complete feed for horses with limited hay or pasture.

Healthy Skin and Hair Coat – Highly digestible fat from Soybean Oil and Flaxseed (sources of Omega-3 and Omega-6 fatty acids) helps provide extra calories for maintaining ideal body condition and helps promote a healthy skin and hair coat.

Brain and Visual Support – Docosahexaenoic Acid (DHA), an Omega-3 fatty acid, is a structural component of nerve cells in the brain and eyes and a key component of heart tissue. Studies have shown that DHA is important for mental and visual development and plays a key role in the anti-inflammatory process.

Available in a 50-lb bag.

SENTINEL® PERFORMANCE LS

PRODUCT DESCRIPTION

Sentinel® Performance LS, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically to enable equine athletes to meet their genetic potential and excel in the many aspects of performance.

Exclusively formulated with high fat, high fiber and low starch/sugar ingredients, it is an ideal choice for equine athletes involved in a variety of competitive disciplines as well as horses with elevated caloric requirements such as hard keepers and rescue horses. This unique formulation of Sentinel® Performance LS is also recommended for certain horses with challenged digestive and/or metabolic systems.

A pressure cooked feed offers a safe and natural way to provide essential nutrition and extra calories to performance horses and is easily digested for optimal nutrient utilization.

FEATURES AND BENEFITS

Immune System Support – Sentinel® incorporates an advanced antioxidant package containing Vitamin E, Vitamin C, Vitamin A, Bio-available Selenium, Chelated Zinc, Copper and Manganese plus Methionine. These antioxidant nutrients support tissue integrity and strength, helping to maintain normal muscle activity and helping to minimize oxidative induced damage in body tissues. A healthy immune system aids in disease resistance, maintaining overall health.

Muscle Performance – Sentinel® contains guaranteed levels of the Amino Acids Lysine, Methionine and Threonine. Amino Acids are the building blocks of quality protein necessary for the continuous rebuilding and repair of muscle tissue in performance horses.

Body Structure and Function – Complete balanced package of macro minerals, trace minerals and vitamins help build, strengthen and maintain all body tissues including bone and muscle. These nutrients also help regulate metabolic activities and help support the immune system to sustain overall health. The more biologically available chelated forms of zinc, copper and manganese plus selenium yeast ensure these nutrients reach their target tissues for enhanced function and health.

Sequential Release of 'Cool' Energy - A specific balance of fat and fermentable fiber provides safe calories at different rates to the body to meet the complex demands of the equine athlete.

SENTINEL® SAFE START SS

PRODUCT DESCRIPTION

Sentinel® Safe Start, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically to meet the high demands of foal growth and mare lactation. A high protein and high fat formulation utilizing low starch/sugar ingredients provides the precise nutrition necessary for healthy foal growth, premium milk composition and optimum milk production in mares.

This unique formulation of Sentinel® Safe Start is also recommended for show horses on low protein hay or when extra shine and condition is desired. A pressure cooked feed offers a safe and natural way to provide essential nutrition and calories to young growing foals and lactating mares and is easily digested for optimal nutrient utilization.

FEATURES AND BENEFITS

Immune System Support – Sentinel® incorporates an Advanced Antioxidant Package containing Vitamin E, Vitamin C, Vitamin A, Bio-available Selenium, Chelated Zinc, Copper and Manganese plus Methionine. These nutrients aid in the development of a healthy immune system in young growing foals. These nutrients also sustain tissue integrity and strength helping to support mammary health in lactating mares.

Growth and Development – Sentinel® contains guaranteed levels of the Amino Acids Lysine, Methionine and Threonine. Amino Acids are the building blocks of quality protein necessary for growth and maintenance of all tissues including bone, muscle, hoof and hair. Protein is also important for milk production in lactating mares.

Body Structure and Function – Complete balanced package of macro minerals, trace minerals and vitamins help build, strengthen and maintain all body tissues including bone and muscle. These nutrients also help regulate metabolic activities and help support the immune system to sustain overall health. The more biologically available chelated forms of zinc, copper and manganese plus selenium yeast ensure these nutrients reach their target tissues for enhanced function and health. Precise mineral nutrition and balance is important for mare milk composition and proper bone development in growing foals.

Low Starch and Sugar Ingredients – A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying-up, DOD, EPSM, colic and laminitis.

SENTINEL® SENIOR SR

PRODUCT DESCRIPTION

Sentinel® Senior, a Nutrient Release Formula feed, is the new generation in equine nutrition formulated specifically for senior horses, prematurely aging horses or horses with poor teeth. Sentinel® Senior is a highly fortified balance of nutrients and an exclusive blend of natural additives to meet the increased nutritional demands of the senior horse due to less efficient digestive and metabolic systems.

This unique formulation of Sentinel® Senior is also recommended for certain senior horses with challenged digestive and/or metabolic systems. A pressure cooked feed offers a safe and natural way to provide essential nutrition and calories to senior horses, prematurely aging horses or horses with poor teeth and is easily digested for optimal nutrient utilization.

FEATURES AND BENEFITS

Immune System Support – Sentinel® incorporates an Advanced Antioxidant Package containing Vitamin E, Vitamin C, Vitamin A, Bio-available Selenium, Chelated Zinc, Copper and Manganese plus Methionine. These nutrients aid in maintaining the integrity and strength of cells and tissues in senior horses, helping to sustain health and wellness under the stresses of aging.

Strong and Healthy Tissues – Sentinel® contains guaranteed levels of the Amino Acids Lysine, Methionine and Threonine. Amino Acids are the building blocks of quality protein necessary for maintenance of all body tissues including bone, muscle, hoof and hair in older horses. Amino acids are also important in regulating body activities and helping form antibodies that fight infections.

Body Structure and Function – Complete balanced package of macro minerals, trace minerals and vitamins help build, strengthen and maintain all body tissues including bone and muscle. These nutrients also help regulate metabolic activities and help support the immune system to sustain overall health. The more biologically available related forms of zinc, copper and manganese plus selenium yeast ensure these nutrients reach their target tissues for enhanced function and health.

Low Starch and Sugar Ingredients - A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with a history of metabolic and digestive challenges, such as Cushing's, insulin resistance, tying-up, DOD, EPSM, colic and laminitis.

ēCUBE COMPLETE SENIOR

PRODUCT DESCRIPTION

ēcube™ is a forage-based, complete feed (TMR, Total Mixed Ration) consisting primarily of alfalfa and grass in a large cube form. A unique process combines quality forages with minerals and vitamins to meet all nutritional requirements of the horse at various life stages.

FEATURES AND BENEFITS

Total Mixed Ration (TMR) – A TMR combines all the ingredients and nutrients required by the horse in a single feed product. No other forage, grain or supplementation necessary.

Natural and Healthy Way to Feed – Feeding ecube continuously throughout the day mimics the natural slow grazing pattern of horses resulting in a consistent and stable digestive environment for optimal digestive health.

Naturally Low-Starch and Low-Sugar – A special blend of alfalfa and grass hay provides a diet less than 10% NSC for horses with a history of metabolic and digestive challenges.

Organic Trace Mineral Complexes – The more biologically available forms are added to help minimize the detrimental effects of mineral imbalances in water and forages.

Vitamins A, D and E – Provides a supplemental source to help guard against deficiencies and maintain optimal health and metabolism.

Cubed Form – Soft, easy-to-chew cubes offer balanced nutrition in every bite and a consistent diet at home or when traveling. Convenient feeding and handling with minimal waste and no sorting.

ADVANTAGES

- High Nutritive Value
- Naturally Low Starch and Sugar Forage
- Balanced Nutrition in Every Bite
- Consistent Diet at Home or While Traveling
- Convenient Feeding and Handling
- Minimal Waste with No Sorting

A TMR IS AN EXCELLENT CHOICE FOR:

- Any horse where consistency and quality of feed is desired for optimal health
- Stressed horses (travel, confinement, frequent changes in daily routine or environment)
- Senior horses with aging digestive systems
- Horses with poor dentition
- Post-surgical horses
- Situations where quality hay is either unavailable or problematic to feed

ēCUBE COMPLETE SENIOR

For horses.

continued

FEEDING DIRECTIONS

Feed as the sole diet to senior horses at the rate of 1.5 - 2.5 lb per 100 lb of body weight per day depending on breed, individual metabolism and desired condition. Complete Senior is also ideal for Junior horses fed at 2.0 - 2.75 lb per 100 lb of body weight per day. Feed should be offered continuously in a self feeder.

If additional hay, pasture or grain ration is offered, contact your Kent Nutrition Group Representative for proper feeding recommendations.

Provide fresh, clean water daily and free-choice salt.

EQUESTRIAN'S CHOICE® 12% PELLET

PRODUCT DESCRIPTION

A pelleted grain ration to be fed for horse maintenance, breeding mares, and horses on good quality hay or pasture.

FEATURES AND BENEFITS

The pellet is the most efficient form of feed for horses. Pelleted feeds result in less dust and waste. Pelleting pre-processes the ingredients in this product which improves digestibility and nutrient utilization in the horses' sensitive digestive tract.

FEEDING DIRECTIONS

Feed to horses at the rate of 0.5 to 1.75 lb of feed per 100 lb body weight depending on horse age, condition, performance level, and reproductive status. See a Kent Nutrition Group Representative for more specific feeding recommendations. Provide high-quality hay or pasture, fresh clean water, and salt free-choice. It is recommended that feed changes be made gradually.

The suggested feeding program is intended solely as a guide. The variables associated with management, environment, and breed may dictate changes in the horses' requirements.

EQUESTRIAN'S CHOICE® 12% SWEET

PRODUCT DESCRIPTION

A classic "texturized" horse feed, combining a blend of oats, corn, pellets, and molasses. It is unique, however, in that it has a high level of guaranteed nutrients at an economy price.

FEATURES AND BENEFITS

Fat level helps ensure energy for performance & endurance.

Corn, oats, soybean meal, and molasses combined in a palatable formula for consistent aroma and taste.

Guaranteed levels of vitamin A, vitamin D, vitamin E, copper, zinc, and selenium mean improved overall health and performance.

FEEDING DIRECTIONS

Feed to horses at the rate of 0.5 to 1.75 pounds of feed per 100 pounds body weight depending on horse age, condition, performance level, and reproductive status. Contact your KNG representative for more specific feeding recommendations. Provide high quality hay or pasture, fresh clean water, and salt free-choice. It is recommended that feed changes be made gradually.

EQUESTRIAN'S CHOICE™ EQUINE MINERAL

PRODUCT DESCRIPTION

A granulated mineral and vitamin supplement specifically designed for horses on a grass-roughage or mixed grass/legume-roughage program (horses on straight alfalfa should be fed Bio-Plus Mineral™).

FEATURES AND BENEFITS

Guaranteed levels of calcium and phosphorus, the two major minerals required by horses.

Guaranteed levels of vital trace minerals and vitamins makes it the perfect companion to Kent equine products.

A locked-formula supplement means only quality ingredients are used, no least-costing or "best-costing" ingredients.

Well-fortified, meaning it may be the only supplement required for maintenance of "easy-keeper" horses.

High vitamin fortification is vital to the overall health and performance of horses.

Guaranteed levels of vitamin A for healthy tissue; **vitamin D** to aid in mineral utilization; and **vitamin E** for reproductive performance.

Cane molasses and other flavors improve palatability and help ensure adequate intake.

The exclusive Kent "Rain-Cote"™ process can reduce the loss of valuable minerals and vitamins exposed to weather (avoid direct rain). Rain-Cote minerals stay free-flowing and palatable even on the wettest days by reducing "bricking up" and helping prevent valuable minerals and vitamins from blowing away in the wind.

Monocalcium and dicalcium phosphates are the two most bio-available sources of phosphorus.

Available in a 25-lb bag with handle for convenience and ease of use. Check plant for availability of 50-lb bags.

FEEDING DIRECTIONS

May be fed as a free-choice mineral supplement or may be mixed with the grain mix to ensure 2-3 oz intake per head daily. For horses doing no more than light work, Equestrian's Choice Equine Mineral can be fed free choice without salt. Hard working horses require additional salt supplementation. If diet consists exclusively of legume hay or legume pasture, additional supplementation of phosphorus for foals may be necessary.

WARNING: Do not feed to sheep.

EQUINE BASE™ 38

PRODUCT DESCRIPTION

A high protein, pelleted supplement designed to be blended or hand fed with Equine Fortifier™ and coarse grains to make a specified protein/grain mix for horses of all ages and activity levels.

FEATURES AND BENEFITS

Contains quality protein sources with high lysine to ensure proper growth and performance.

Works together with Equine Fortifier allowing greater flexibility in designing horse rations varying from 10-16% crude protein.

Precise nutrition for mixing rations with the desired level of Equine Base 38 and 100 lb/ton of **Equine Fortifier** provides optimum levels of minerals and vitamins regardless of protein level.

Pelleted to mix well with coarse grains.

MIXING RATINGS

	<u>Protein, %</u>	<u>10</u>	<u>12</u>	<u>14</u>	<u>16</u>
Crimped whole oats		1000	850	800	700
Rolled corn		800	800	700	650
Equine Base 38	--		150	300	450
Equine Fortifier	100	100	100	100	100
Molasses	<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>
Total, lb		2000	2000	2000	2000

FEEDING DIRECTIONS

Feed the above mixing ratings at the rate of 0.5 - 1.75 lb per 100 lb of body weight daily depending on horse age, condition, performance level, and reproductive status. When hand-feeding, feed 0.5 - 2.5 lb Equine Base 38/head/day along with 0.15 - 0.75 lb Equine Fortifier/head/day depending on horse age, condition, performance level, and reproductive status.

See a Kent Nutrition Group Representative for more specific feeding recommendations. Provide high-quality hay or pasture free choice and fresh clean water. It is recommended that feed changes be made gradually.

Consumption will vary depending on animals size; quality, source and availability of roughage and/or grains; number of animals and location.

The suggested feeding program is intended solely as a guide. The variables associated with management, environment, and breed may dictate changes in the animals' requirements.

EQUINE CHOICE® TOPLINE 12 & 32

PRODUCT DESCRIPTION

This pelleted supplement is formulated to balance an equine forage diet naturally and efficiently. With its concentrated vitamin and mineral levels, your horse will require only 1.0 - 3.0 lb daily, making this an efficient way to supplement your feeding program. The fixed component formula gives your horse the same high quality nutrition day after day.

FEATURES AND BENEFITS

Guaranteed levels of Amino acids help build top line and maintain overall health.

Guaranteed levels of Biotin supports and helps build healthy hooves.

Guaranteed levels of Calcium supports proper bone development.

Guaranteed levels of Phosphorus supports the development of bones and teeth.

Guaranteed levels of Vitamin E is an antioxidant important for a healthy immune system.

Low dietary starch and sugar for horses with metabolic syndrome.

Ideal for easy keepers, ponies, miniature horses.

Concentrated formula to minimize daily feeding amounts.

Naturally preserved to retain freshness and palatability.

Can be mixed with unfortified grains.

Can be fed as the only supplement along with forage for weight control.

Can be fed to horses of all ages and activity levels.

FEEDING DIRECTIONS

This product is designed to be fed with unfortified whole grain and a quality forage diet. The feeding rate depends on age, size or metabolic status of the horse.

- topline 12 is designed for horses on quality pasture or high quality forage.
- topline 32 is designed for horses on mostly grass forage.

Age/Type	lb per day
4 - 8 months	2.0 - 3.0
9 - 17 months	2.0 - 2.5
18 - 24 months	2.0
Maintenance	1.0 - 1.5

EQUINE CHOICE® TURNOUT

A Natural Way to Supplement Forage

PRODUCT DESCRIPTION

Equine Choice® Turnout is a unique supplement formulated to help correct and balance the nutritional deficiencies of pasture and hay. The product is a cooked, hardened blend of molasses solids, fat, protein, minerals, and vitamins. Equine Choice® Turnout offers a high-energy, balanced nutritional supplement for horses in a palatable, labor-saving, controlled-consumption package!

FEATURES AND BENEFITS

Energy Dense - The combination of molasses and fat provides controlled energy release in a highly digestible product. Molasses, with its high sugar content, stimulates intake and provides a readily available energy source. Vegetable oil, the most concentrated source of energy, increases energy density and efficiency while improving skin and hair coat condition.

Balanced Mineral Nutrition - Mineral supplementation is necessary to help minimize the detrimental effects of mineral imbalances found in forages. Optimum levels and ratios are supplied by Equine Choice® Turnout to ensure a balanced diet for maintenance, breeding, and performance.

Complete Vitamin Nutrition - Guaranteed levels of all vitamins, including the B-complex, eliminates the need for special vitamin paks. Vitamins A, D, and E are added to provide a supplemental source to guard against deficiencies and help maintain optimal health and metabolism. B-vitamins, including Biotin, are important for the efficient breakdown and transformation of nutrients into usable energy. B-vitamins also help maintain the growth and health of skin, hair and hooves.

Digestive Function - To consume the product, horses will gradually lick the surface of Equine Choice® Turnout throughout the day. This ensures a slow, steady intake of nutrients, which supports the digestive environment for efficient forage utilization. This licking action also increases saliva production, which further aids in digestion and minimizes digestive upsets.

Natural Consumption - The physical form of Equine Choice® Turnout initially presents as a hard product, but soon forms a thin layer of soft, viscous material on the surface as it draws moisture from the air. This layer is readily consumed by horses. As more moisture from the air along with saliva from previous licking meets the exposed surface of the product, another thin layer of material becomes available for consumption. This process results in a slow, controlled consumption that mimics the natural eating pattern (grazing) of horses, allowing nutrients to be gradually introduced to the digestive system throughout the day.

Labor Saving, Weather Resistant Package - Equine Choice® Turnout can be self-fed. The product comes in 33.3-lb pails for hanging in a stall, and 50-lb rubber tubs or 250-lb plastic barrels that can be placed directly on the ground, eliminating daily feeding and handling. Rain, snow, heat, or cold does not affect the composition or consumption. Excess moisture or heat does not cause the product to soften or melt down.

FEEDING DIRECTIONS

Free-choice Equine Choice® Turnout to horses on all types of rations to provide supplemental nutrients when fed along with grain and roughages. Place pail(s) or tub(s) or barrel(s) in a dry location near the animal's source of water, salt, mineral, or loafing area. Consumption will vary depending on animal size; stage of production; quality, source, and availability of roughage and/or grains; number of animals per pail/tub/barrel; and location.

	33.3-lb pail	50-lb tub	250-lb barrel	Intake/head/day
Number of Horses	1 - 2	2 - 3	9 - 15	0.5 to 1.5 lb

DAILY INTAKE VALUES ARE APPROXIMATE. To increase consumption, decrease the number of animals per pail/tub/barrel. To reduce consumption, increase the number of animals per pail/tub/barrel, or place pail/tub/barrel away from the normal loafing area. Provide clean, fresh water and free-choice salt at all times.

The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the horses' requirements.

Do not stack anything on top of containers without placing a slipsheet or wooden pallet between them.

EQUINE FORTIFIER™

PRODUCT DESCRIPTION

A pelleted supplement containing high levels of minerals and vitamins. It is designed to be blended or hand-fed with coarse grains and Equine Base™ 38 as necessary to make a specified protein/grain mix for horses of all ages and activity levels.

FEATURES AND BENEFITS

Provides the minerals and vitamins to build strong bones, healthy tissues and firm muscles.

Correct vitamin levels are necessary for proper breeding performance and fertility, and maximum growth.

Works together with Equine Base 38 allowing greater flexibility in designing horse grain rations varying from 10-16% crude protein.

Mixing rations with the desired level of Equine Base 38 and 100 lb/ton of Equine Fortifier provide optimum levels of mineral and vitamins regardless of protein level.

EQUINE FORTIFIER™

A mineral-vitamin supplement to be fed to horses for growth, breeding, performance, and maintenance.

MIXING RATIONS

Protein, %	10	12	14	16
Crimped whole oats	1000	850	800	700
Rolled corn	800	800	700	650
Equine Base 38	--	150	300	450
Equine Fortifier	100	100	100	100
Molasses	100	100	100	100
Total, lb	2000	2000	2000	2000

FEEDING DIRECTIONS

Feed the above mixing rations at the rate of 0.5 - 1.75 lb per 100 lb of body weight daily depending on horse age, condition, performance level, and reproductive status. When hand-feeding, feed 0.5 -2.5 lb Equine Base 38/head/day along with 0.15 - 0.75 lb Equine Fortifier/head/day depending on horse age, condition, performance level, and reproductive status. See a Kent Nutrition Group Representative for more specific feeding recommendations. Provide high-quality hay or pasture free choice and fresh clean water. It is recommended that feed changes be made gradually.

The suggested feeding program is intended solely as a guide. The variables associated with management, environment, and breed may dictate changes in the animals' requirements.

OMEGATIN®

PRODUCT DESCRIPTION

OMEGATIN is a proportionally balanced, complete, 15% protein, 20% fat, pelleted, nutrient-dense horse feed with an exceptionally low level of starch (13.5%).

FEATURES AND BENEFITS

20% fat for high calories and low carbohydrates.

The low starch level is approximately 50% less than many popular “rice-bran” products, made possible due to highly digestible and specialized proprietary ingredients.

Low starch means reduced risk of gas colic, laminitis, and a lower glycemic response.

Chelated trace minerals for natural bioavailability of trace minerals critical to good health and optimum performance.

Flaxseed to provide omega fatty acids.

A soft pellet means none of the digestive and feeding problems associated with a meal; and ingredients are not exposed to the high temperatures and pressures of extrusion. It is ideal for horses with few or sensitive teeth.

Selenium yeast which has shown to have higher retention and digestibility than sodium selenite.

Selenium and vitamin E enhance the immune system, improve reproduction, overall health, performance, and appearance.

Locked formula ensures product quality and consistency with no least costing or “best-costing” of ingredients. NO substituted ingredients to challenge cecum bacteria, which improves digestibility and helps prevent cecal colic.

Proper calcium-to-phosphorus ratio helps prevent one heavily fortified nutrient from interfering with the availability of other nutrients.

Supplemental lysine, methionine, and threonine (the three most-limiting amino acids in an equine diet) offer the option of feeding as a complete or a supplement.

MICRO-AID®, a natural product designed to reduce ammonia odors, especially beneficial in confined situations.

Research-proven for peace of mind.

Available in 40-lb (#7666) and 20-lb (#8087).

OMEGATIN®

An energy supplement for horses.

MANE MENU™ 12% PELLET

PRODUCT DESCRIPTION

MANE MENU 12% PELLET is a low-protein, pelleted grain ration for pleasure/maintenance horses fed good-quality hay or pasture. **MANE MENU 12% PELLET** offers a convenient nutritional package for the lifelong enjoyment of pleasure horses.

Available in a 50-lb bag.

FEATURES AND BENEFITS

Pelleted - high-quality ingredients in a pelleted form maximizes the digestibility and nutrient utilization of grains in the horse's sensitive digestive tract.

Low Protein - pleasure horses fed good-quality hay have a reduced need for added protein in their grain ration.

Moderate Fiber Level - helps sustain digestive health.

Guaranteed Levels of Calcium and Phosphorus - help ensure proper calcium-to-phosphorus ratio and provide correct levels for bone and muscle activity.

Added Trace Minerals and Vitamins - provide a supplemental source to meet nutritional requirements and maintain optimal health and metabolism.

MANE MENU™ 12% PELLET

A pelleted feed for pleasure/maintenance or mature horses.

FEEDING DIRECTIONS

SUGGESTED FEEDING RANGE*

Horse Class	Age	lb/100 lb body weight/day
ADULT		
Maintenance	Mature	0.40 – 0.80

*Suggested program is based on offering grass or mixed grass hays

It is necessary to adjust the feeding rate of Mane Menu 12% Pellet to the condition of the horse. Provide good-quality hay or pasture, free-choice salt, and plenty of fresh water. If feeding legume hays, rich pasture, or if Mane Menu 12% Pellet is fed below the recommended feeding range, consult your Kent Nutrition Group Representative for a ration recommendation.

The suggested feeding program above is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animal's dietary requirements.

CAUTION: This feed contains supplemental copper. Do not feed to sheep.

Store in a cool dry place. This product may spoil if stored under adverse conditions. Do not feed this product if believed to be unfit for animal consumption.

MANE MENU™ 12% TEXTURED

PRODUCT DESCRIPTION

MANE MENU 12% TEXTURED is a low-protein, textured grain ration for pleasure/maintenance horses fed good-quality hay or pasture. **MANE MENU 12% TEXTURED** is a blend of pellets, flaked corn and flaked barley lightly wrapped in molasses for excellent acceptance and palatability. It offers a convenient nutritional package for the lifelong enjoyment of pleasure horses.

Available in a 50-lb bag.

FEATURES AND BENEFITS

Blend of Quality Grains and Pellets - the blend of pellets, corn, and barley provides energy to the horse at different rates for controlled energy release while the coarse texture encourages salivation and aids in digestion.

Low Protein - pleasure horses fed good-quality hay have a reduced need for added protein in their grain ration.

Moderate Fiber Level - helps sustain digestive health.

Guaranteed Levels of Calcium and Phosphorus - help ensure proper calcium-to-phosphorus ratio and provide correct levels for bone and muscle activity.

Added Trace Minerals and Vitamins - provide a supplemental source to meet nutritional requirements and maintain optimal health and metabolism.

ROUNDERS®

Carrot Flavored Horse Treats

PRODUCT DESCRIPTION

Carrot Flavored Rounders® are an all-natural horse treat, fortified with vitamins and minerals. **Carrot Flavored Rounders®**, made with real carrots, have a unique flavor that horses can't resist.

Available in a 30-oz re-sealable bag.

FEATURES AND BENEFITS

Made with All-Natural Ingredients - Healthier for horse, more acceptable to owner.

Chelated Zinc, Copper and Manganese, Plus Bio-Available Selenium - The greater absorption and utilization of zinc, copper, manganese and selenium helps meet the increased needs for bone, muscle and tissue strength in growing horses and performance horses. Overall reproductive performance and efficiency is sustained in breeding mares and stallions.

Vitamin Fortified - Provides a supplemental source of vitamins to guard against deficiencies and maintain optimal health.

Unique and Highly Palatable Flavor - Keeps horses coming back for more.

FEEDING DIRECTIONS

3-10 **Carrot Flavored Rounders®** may be fed per day as training rewards, treats in the corral or pasture, and while riding on the trail.

The suggested feeding program above is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the horses' requirements.

ROUNDERS®

EZ-Go™ Horse Treats with Glucosamine HCl and Chondroitin Sulfate

PRODUCT DESCRIPTION

EZ-Go™ Rounders® are a highly palatable horse treat that is designed for the horse with joint-related problems. **EZ-Go™ Rounders®** are fortified with Glucosamine HCl and marine-source Chondroitin Sulfate - the building blocks of healthy cartilage. Horses that are suffering from joint-related problems either due to age, trauma or inflammation may benefit from **EZ-Go™ Rounders®**.

Available in a 30-oz re-sealable bag.

FEATURES AND BENEFITS

Made with All-Natural Ingredients - Healthier for horse, more acceptable to owner.

Chelated Zinc, Copper and Manganese, Plus Bio-Available Selenium - The greater absorption and utilization of zinc, copper, manganese and selenium helps meet the increased needs for bone, muscle and tissue strength in growing horses and performance horses. Overall reproductive performance and efficiency is sustained in breeding mares and stallions.

Vitamin Fortified - Provides a supplemental source of vitamins to guard against deficiencies and maintain optimal health.

Unique and Highly Palatable Flavor - Keeps horses coming back for more.

SUGGESTED FEEDING RECOMMENDATIONS:

Five (5) **EZ-Go™ Rounders®** provides the horse with 3,600 mg of Glucosamine HCl and 1,200 mg of Chondroitin Sulfate. Feed less to smaller horses and more to larger horses. *For example:*

	Horse's Weight (in pounds)		
	800	1,000	1,200
Number of EZ-Go™ Rounders®	4	5	6

The suggested feeding program above is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the horses' requirements.
