CONCERTO®

Premium Wild Bird Seed Mix

PRODUCT DESCRIPTION

Concerto® is a corn-free, high-energy mix with extra high levels of black oil sunflower seeds, sunflower chips and white safflower, blended with peanut hearts and white millet. Concerto is formulated for Cardinals, Finches, Grosbeaks and more. It is an exceptional winter feed.

Available in 40-lb bags.

FEATURES AND BENEFITS

Corn-Free - Discourages undesirable ground-feeders, such as blackbirds, grackles, etc.

High Levels of Black Oil Sunflower Seeds - Attractive to most varieties of wild songbirds.

High Levels of White Safflower Seeds - Preferred seed choice of the Northern Cardinal.

Added Sunflower Chips & Peanut Hearts - High in energy with no empty shell clean-up.

Greatest Variety of Seeds - Attractive to more varieties of wild birds.

Free from Undesirable Seeds (Red Millet, Red Milo, etc.) - No filler seeds equals less waste. More seed is eaten and not discarded.

Superior Quality to Comparably-Priced Mixes - Greater value.

FEEDING RECOMMENDATIONS

To successfully attract and enjoy bird activity select a feeder and feeder location appropriate for the birds you would like to invite, ideally in an area easily viewed from your favorite window.

SONG MAKER®

Premium Wild Bird Seed Mix

PRODUCT DESCRIPTION

Song Maker® is a nutritious blend of a wide variety of seeds such as black oil sunflower, sunflower chips, peanut hearts, cracked corn and white millet. Dark-eyed Juncos, Eastern Towhee, Gray Catbird, Sparrows and the Tufted Titmouse are among those that will favor this mix.

Available in 40-lb bags.

FEATURES AND BENEFITS

Increased Levels of Sunflower Seeds and Less White Millet - Attractive to more varieties of wild birds.

Added Sunflower Chips - High in energy with no empty shell clean-up.

Wide Variety of Seeds - Attractive to more varieties of wild birds.

Free from Undesirable Seeds (Red Millet, Red Milo, etc.) - No filler seeds equals less waste. More seed is eaten and not discarded.

Superior Quality to Comparably-Priced Mixes - Greater value.

FEEDING RECOMMENDATIONS

To successfully attract and enjoy bird activity select a feeder and feeder location appropriate for the birds you would like to invite, ideally in an area easily viewed from your favorite window.

ANTLER KING® DEER/ELK PELLETS

PRODUCT DESCRIPTION

Deer: A complete pelleted grain ration for development of fawns and for antler growth in bucks; maintenance diet for does.

Elk: A complete pelleted grain ration for growing and developing calves; breeding, gestating and maintenance for cows; velvet and maintenance for bulls.

FEATURES AND BENEFITS

High protein levels which research shows leads to larger antlers, larger bodies, and healthier deer and elk.

High levels of easily absorbed minerals have been shown to build bigger antlers and produce bigger bodies.

Yeast Culture aids in the absorption of trace minerals, increases feed efficiency, and aids in the digestion of fiber.

High levels of selenium and vitamin E help support reproduction, help reduce the effects of stress, and help prevent white muscle disease.

FEEDING DIRECTIONS

DEER

Fawns: Feed Antler King Deer/Elk Pellets as the sole grain ration for the first year of life. Provide good quality hay or pasture.

Adults: Feed Antler King Deer/Elk Pellets as the sole grain ration year around or use the program below:

	Feb. 1 - Aug. 31	Sept. 1 - Nov. 30	Dec. 1 - Jan. 31
Antler King Deer/Elk Pellets	100%	80%	60%
Corn	0%	20%	40%

Always provide free choice good quality hay or pasture. Be sure a good source of water is always available.

ELK

Calves: From birth - 15 months - Feed 2 - 5 lb/head/day. At nine months of age, you may substitute 25% of the pellets with corn or oats.

Cows: November to March - Gestation Maintenance: Feed 1 - 2 lb. Cows should have a condition score of 3.0 - 3.5. If cows are under conditioned, feed additional corn. Be careful not to over condition cows, as this can cause calving problems.

Cows: April to May - Gradually increase to 2 - 4 lb/head/day; **June to August** - Feed 2 - 6 lb/head/day; **September to October** - Flush for breeding season. Feed 2 lb/head/day along with up to 5 lb/head/day of grain.

Bulls: February to June - Velvet Diet. Feed 3 - 8 lb/head/day of product or 3 - 5 lb of product with 1 - 3 lb/head/day of grain; **July to January** - Maintenance Diet. Feed 1 - 2 lb product with 1 - 3 lb grain/head/day, depending on condition.

Always provide free-choice good-quality hay or pasture. Be sure a good source of water is always available.

WARNING - Do not feed to sheep.

ANTLER KING® HI PROTEIN BIG BUCK BLOCK

PRODUCT DESCRIPTION

A nutrient source for deer designed to produce larger antlers and bodies.

FEATURES AND BENEFITS

Ingredients and added flavors attract deer and keep them coming back to the feeding site.

Added nutrition will reduce post-rut stress and offers bucks the opportunity to grow antlers to their genetic potential.

FEEDING DIRECTIONS

Place blocks near trails or other areas frequented by deer.

Check blocks as often as weekly, but at least monthly. When block is nearly gone, add a new block.

Consumption will vary based on many factors, including: forage availability and quality; season; and block location.

WARNING

Do not feed to sheep.

ANTLER KING® TROPHY DEER MINERAL

PRODUCT DESCRIPTION

A nutritional supplement specifically designed for deer to enhance antler development and overall health.

FEATURES AND BENEFITS

The proper ratio of calcium and phosphorus to support deer health and produce substantially larger antlers.

Chelated trace minerals more readily absorbed and used in the tissue, producing larger antlers, larger bodies, and better overall health.

Yeast culture to help deer better digest nutrients to improve feed usage.

Vitamin E to support the immune system and reproduction.

FEEDING DIRECTIONS

1. Place near deer trails or other areas frequented by deer.
2. Dump entire contents of one bag in a pile on the ground. Do not sprinkle over a large area. This would comprise one feeding station.
3. Do not offer any additional salt or products containing salt in the area of the feeding station(s).
4. You should have one feeding station per 40 - 60 acres. Check stations at least monthly. When mineral is low, add a new bag. Consumption will vary from 1 - 5 ounces per head per day.

Greatest consumption will be March through August. This is also the period when antler growth is occurring and when fawns are nursing. Although consumption drops dramatically after the antlers are developed, it is important to have product available all year.

WARNING

Do not feed to sheep.

DEER & ELK 18

PRODUCT DESCRIPTION

A complete feed for growing deer and elk.

FEATURES AND BENEFITS

Pelleted complete grain ration for less waste and palatability. This means better utilization of feed and improved feed efficiency.

Added vitamins and minerals helps improve overall health, grow bigger bodies and antlers, and improve reproduction.

FEEDING DIRECTIONS

Feed at the rate of 2-4 lb/head/day depending on animal size and condition, as a complete feed or in combination with good-quality roughage.

TROPHY IMAGE®

16 & 165

PRODUCT DESCRIPTION

A complete feed or in combination with good roughage for growing deer and elk.

TROPHY IMAGE® 18

PRODUCT DESCRIPTION

A complete feed for growing deer and elk.

TROPHY IMAGE® 20

PRODUCT DESCRIPTION

A complete feed for development of elk calves and deer fawns, and for antler growth in bucks and bulls.

FEATURES AND BENEFITS

Pelleted for less waste and better palatability results in better utilization of feed and improved feed efficiency.

Added vitamins and minerals helps improve overall health, grow bigger bodies and antlers, and improve reproduction.

Organic trace minerals for improved absorption to help build bigger antlers and produce bigger bodies.

Yeast cultures aids in the absorption of trace minerals and increase feed efficiency.

High levels of selenium & vitamin E increases reproduction, helps reduce the effects of stress.

FEEDING DIRECTIONS

Trophy Image 16 & 165: Feed at the rate of 2 - 4 lb per head per day depending on size and condition of deer or elk.

Trophy Image 18: Feed at the rate of 2 - 4 lb/head/day depending on animal size and condition, as a complete feed or in combination with good-quality roughage.

Trophy Image 20: Feed two to four lb/head/day to fawns or calves, and yearling bucks or bulls depending on size and condition, along with good quality hay or pasture. Feed free choice to bucks from January until velvet shed, along with good quality hay or pasture. Provide fresh, clean water, salt, and mineral free-choice.

TROPHY IMAGE® MIXER PELLET

PRODUCT DESCRIPTION

A supplement for deer and elk.

FEATURES AND BENEFITS

Add to locally grown corn to reduce feed costs.

Organic trace minerals are easily absorbed which can build bigger antlers and produce larger bodies.

Yeast cultures aid in the absorption of trace minerals and increases digestibility of fiber.

High levels of selenium and vitamin E support reproduction and help reduce the effects of stress.

FEEDING DIRECTIONS

Blend with grain feed as directed below with hay or forage.

BLENDING RATIOS
