# EVANS 14% ALPACA MAINTENANCE KIBLET

## PRODUCT DESCRIPTION

An apple-flavored pellet designed to provide a balance of protein, energy and fiber to mature alpacas with excellent acceptance and palatability.

## FEATURES AND BENEFITS

**A combination of quality fiber sources** provides highly digestible and fermentable fibers to help maintain a healthy digestive environment.

**Optimum level and ratios of chelated trace minerals** are supplied to ensure a balanced diet for maintenance and performance. The more biologically available chelated forms are added to help minimize the detrimental effects of mineral imbalances in water and forages.

**A high level of vitamin E and selenium** is added to help guard against deficiencies and maintain optimal health and metabolism.

**B complex vitamins (including biotin, niacin, and thiamine)** are involved in the metabolism of carbohydrates, fat and protein and are important for the growth and health of skin, wool, and hooves.

**A high level of yeast culture** is added to help promote a functional microbial fermentation, sustaining nutrient digestibility and utilization with fewer digestive problems.

## FEEDING DIRECTIONS

**Females** - feed at a rate of 0.50 lb/100 lb of body weight/head/day or approximately 0.75 lb per average 150 lb alpaca/head/day. For late gestation (last 4 weeks) and lactation, feed Evans Camelid S/G/L Kiblet.

**Males** - males and geldings usually require 20% - 26% less supplement. Feed at a rate of 0.65 - 0.75 lb/head/day.

For periods of extreme cold, the added energy and feeding rates of Evans Camelid S/G/L Kiblet formula is recommended. The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animals' requirements.

**CAUTION:** This feed contains supplemental copper - do not feed to sheep.

## EVANS 14% ALPACA MAINTENANCE KIBLET

# EVANS ALPACA MAINTENANCE

## PRODUCT DESCRIPTION

**Evans Alpaca Maintenance** is a quality blend of pellets, crimped oats, flaked corn, and extruded nuggets lightly wrapped in molasses and vegetable oil. **Evans Alpaca Maintenance** provides a balance of protein, energy and fiber to mature alpacas with excellent acceptance and palatability.

**Evans Camelid Supplements** are formulated to complement grass hay and pasture that tests 10% to 14% protein and 55% to 60% TDN with a potassium level of less than 2.5%.

## FEATURES AND BENEFITS

**Blend of Quality Grains, Pellets and Oil** - The blend of pellets, corn, oats, and vegetable oil provides energy to the Alpaca at different rates for controlled energy release while the coarse texture increases salivation and aids in maintaining healthy digestion.

**Extruded Nuggets** - The high quality extruded form maximizes feed and nutrient digestibility and utilization while slowing the rate of feed intake, thus helping to minimize digestive upsets and choking.

**High-Fiber Level** - A combination of quality fiber sources including; soy hulls, alfalfa and rice bran in an extruded form provides highly digestible and fermentable fibers to help maintain a healthy digestive environment.

**Chelated Trace Minerals** - Optimum levels and ratios are supplied to ensure a balanced diet for maintenance and performance. The more biologically available chelated forms are added to help minimize the detrimental effects of mineral imbalances in water and forages.

**Vitamin E and Selenium** - A high level of Vitamin E and Selenium is added to help guard against deficiencies and maintain optimal health and metabolism.

**B-Complex Vitamins (including Biotin, Niacin, and Thiamin)** - B vitamins are involved in the metabolism of carbohydrates, fat and protein and are important for the growth and health of skin, wool, and hooves.

**Yeast Culture** - A high level of yeast culture is added to help promote a functional microbial fermentation, sustaining nutrient digestibility and utilization with fewer digestive problems.

Available in a 50-lb bag.

## **SUGGESTED FEEDING RECOMMENDATIONS**

**Females:** Feed **EVANS ALPACA MAINTENANCE** at a rate of 0.50 lb. per 100 lbs. of body weight per head per day or approximately 0.75 lb. per average 150 pound Alpaca per head per day. For late Gestation (last four weeks) and Lactation, feed **EVANS CAMELID S/G/L**.

**Males:** Males and Geldings usually require 20% to 25% less supplement. Feed **EVANS ALPACA MAINTENANCE** at a rate of 0.65 to 0.75 lb. per head per day.

For periods of extreme cold, the added energy and feeding rates of **EVANS CAMELID S/G/L** formula is recommended.

The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animals' requirements.

# EVANS CAMELID S/G/L

## PRODUCT DESCRIPTION

**Evans Camelid S/G/L** is a quality blend of pellets, crimped oats, flaked corn, and extruded nuggets lightly wrapped in molasses and vegetable oil. Designed to meet the high demands of cria growth and female gestation and lactation, **Evans Camelid S/G/L** provides the proper balance of protein, energy, vitamins and minerals for the professional breeding operation. **Evans Camelid Supplements** are formulated to complement grass hay and pasture that tests 10% to 14% protein and 55% to 60% TDN with a potassium level of less than 2.5%.

## FEATURES AND BENEFITS

**Blend of Quality Grains, Pellets and Oil** - The blend of pellets, oats, corn, and vegetable oil provides energy to growing cria and to reproducing females at different rates for controlled energy release, while the coarse texture increases salivation and aids in maintaining healthy digestion.

**Extruded Nuggets** - The high-quality extruded form maximizes feed and nutrient digestibility and utilization while slowing the rate of feed intake, thus helping to minimize digestive upsets and choking.

**High-Fiber Level** - A combination of quality fiber sources including; soy hulls, alfalfa and rice bran in an extruded form provides highly digestible and fermentable fibers to help maintain a healthy digestive environment.

**Chelated Trace Minerals** - The greater absorption and utilization of chelated zinc, copper and manganese helps meet the increased needs for bone, muscle and tissue strength in growing cria. Overall reproductive performance and efficiency is sustained in breeding females fed chelated trace minerals.

**Vitamin E and Selenium** - A high level of Vitamin E and Selenium is added to help guard against deficiencies and maintain optimal health and metabolism. Vitamin E and Selenium work together to help prevent white muscle disease.

**B-Complex Vitamins (including Biotin, Niacin, and Thiamin)** - B vitamins are involved in the metabolism of carbohydrates, fat and protein and are important for the growth and health of skin, wool, and hooves.

**Yeast Culture** - A high level of yeast culture is added to help promote a functional microbial fermentation, sustaining nutrient digestibility and utilization with fewer digestive problems.

Available in a 50-lb bag.

## **FEEDING DIRECTIONS**

**As a Starter:** Feed **EVANS CAMELID S/G/L** at a rate of 0.33 to 0.50 lb per 50 lb of body weight per head per day. **EVANS CAMELID S/G/L** is recommended as a supplement from 2 to 3 months through 9 to 12 months of age.

### **For Late Gestation and Lactation:**

**ALPACAS** - Feed **EVANS CAMELID S/G/L** at a rate of 1.0 lb per head per day for the last 4 weeks of Gestation and 1.0 to 1.25 lb per head per day for Lactation. Feeding rate depends on Alpaca size (150 lb average), forage quality, body condition score, and level of milk production.

**LLAMAS** - Feed **EVANS CAMELID S/G/L** at a rate of 1.25 to 1.50 lb per head per day for the last 4 weeks of Gestation and 1.50 to 1.75 lb per head per day for Lactation. Feeding rate depends on Llama size (300 lb average), forage quality, body condition score, and level of milk production.

The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animals' requirements.

# EVANS CAMELID S/G/L KIBLET

## PRODUCT DESCRIPTION

An apple flavored pellet designed to meet the needs of cria growth and female gestation and lactation. It provides the proper balance of protein, energy, vitamins, and minerals for the professional breeding operation.

## FEATURES AND BENEFITS

**A combination of quality fiber sources** provides highly digestible and fermentable fibers to help maintain a healthy digestive environment.

**Optimum levels and ratios of chelated trace minerals** are supplied to ensure a balanced diet for maintenance and performance. The more biologically available chelated forms are added to help minimize the detrimental effects of mineral imbalances in water and forages.

**A high level of vitamin E and selenium** is added to help guard against deficiencies and maintain optimal health and metabolism.

**B complex vitamins** (including biotin, niacin, and thiamine) are involved in the metabolism of carbohydrates, fat and protein and are important for the growth and health of skin, wool, and hooves.

**A high level of yeast culture** is added to help promote a functional microbial fermentation, sustaining nutrient digestibility and utilization with fewer digestive problems.

## FEEDING DIRECTIONS

**As a Starter:** feed at a rate of 0.33 - 0.50 lb per 50 lb body weight/head/day.

**As a Grower:** feed as a supplement from 2 - 3 months through 9 - 12 months of age.

### For Late Gestation and Lactation:

**Alpacas** - feed at a rate of 1.0 lb/head/day for the last 4 weeks of gestation and 1.0 - 1.25 lb/head/day for lactation. Feeding rate depends on alpaca size (150 lb average), forage quality, body condition score, and level of milk production.

**Llamas** - feed at a rate of 1.25 - 1.50 lb/head/day for the last 4 weeks of gestation and 1.50 to 1.75 lb/head/day for lactation. Feeding rate depends on llama size (300 lb average), forage quality, body condition score, and level of milk production.

The suggested feeding program is intended solely as a guide. The variables of management, environment, and breed may dictate changes in the animals' requirements.

**CAUTION:** This feed contains supplemental copper - do not feed to sheep

# EVANS VITAMIN-MINERAL BLEND E™

## PRODUCT DESCRIPTION

Complements alpaca and llama bagged feed supplements formulated by Dr. Evans. Several field studies with this blend indicated total daily consumption by either alpacas or llamas will average between 0.34 & 0.50 oz per day. Depending on forage quality and availability, consumption may vary from intake to almost 1 oz per day (1 oz approximates 1 level teaspoon). 1 oz can satisfy about 20% of the major mineral needs such as calcium, phosphorus, magnesium, etc, 50% of needed selenium and nearly 100% of the suggested vitamin intake.

## FEATURES AND BENEFITS

**Additional levels of vitamins and minerals** are beneficial to maidens who are still growing, yet gestating, and the gestating-lactating mother.

**Increased source of readily available vitamins and minerals** can alleviate or prevent arthritis and musculoskeletal breakdown in middle-aged animals.

**Contains digestive aids and levels of B vitamins** to minimize the effect of "fescue-fungus" and help lower body temperatures during extreme periods of heat and humidity.

**B vitamins** have been added to aid milk production, as well as promote hair growth and equality in other species.

**Levels of the vitamins A, D, & E, as well as selenium** should help satisfy daily requirements without fear of toxicity.

Available in a 25-lb pail.

## FEEDING DIRECTIONS

Feed free-choice or top-dress 0.25 to 0.40 oz per head per day.

For non-food producing camelids only.

Suggested use is 4 months. The suggested feeding program is intended solely as a guide.

The variables of management, environment and breed may dictate changes in the animals' requirements.

## EVANS VITAMIN-MINERAL BLEND E™

Formulated for camelids.
